

# OCCUPATIONAL SAFETY & HEALTH

Assero Resources can assist your company with developing, implementing or simply auditing your Safe Work Practices to ensure they not only meet regulatory requirements, but also are the most functional programs for your type of business. Our programs are developed to meet your company's specific needs so that the processes are not only compliant, but also functional for your business.

Assero's program services include:

- Development of OSHA 1910 Safety & Health Programs & Policies
- On-Site Safety & Health Training & Training Programs
- OSHA 1910 Program Auditing & Benchmarking
- On-Site Facility Safety Reviews & Auditing
- Safety Retainer Services

Companies that invest in sound safety practices have experienced:

increased productivity

increased employee health & morale

lower insurance premiums

decreased expenses for worker's compensation

increased profits

increased quality & production
